## Endeavour Federation Curriculum Map: Food Technology

|  | Food Technology Curriculum Map   |
|--|--|
| Endeavour Federation Curriculum vision | At the Endeavour Federation, we follow an adapted National Curriculum, with wellbeing central to everything we do. We offer a broad and balanced curriculur a range of subjects, following bespoke pathways. The study of these subjects, allows pupils to apply theoretical knowledge to the practical element<br>We believe in all our students and have high expectations for their futures. A comprehensive package of both pastoral and learning support, delivered by learning journeys and improve their life outcomes, becoming the best versions of themselves.   |
| Food Technology curriculum vision      | Our curriculum aims to develop not only a love of cooking, but also a deep understanding of how food is produced and the vital role it plays in good he         • Enable pupils to create exciting meals that are well presented.         • Ensure that pupils have a clear and in depth understanding of the nutrients contained in the dishes that they create.         • Ensure that pupils know not only the nutritional value of foods but also the function of those nutrients and the effect they have on health.         • Give pupils a good understanding of hygiene and safety, how food processes work and food science.         Through food and nutrition, students will:         1. Demonstrate effective and safe cooking skills by planning, preparing and cooking using a variety of food commodities, cooking techniques and equip         2. Develop knowledge and understanding of the functional properties and chemical processes as well as the nutritional content of food and drinks.         3. Understand the relationship between diet, nutrition and health, including the physiological and psychological effects of poor diet and health.         4. Understand the economic, environmental, ethical, and socio-cultural influences on food availability, production processes, and diet and health choic         5. Demonstrate knowledge and understanding of functional and nutritional properties, sensory qualities and microbiological food safety consideration |
|  | At the Endeavour Federation, we want students to understand the impact of good food choices, and how this contributes to a healthy, balanced lifesty government guidelines and given the tools to make their own healthy eating decisions . Topics such as food storage and hygiene, health and safety, an KS2 upwards and revisited regularly. Food providence (how and where it is produced, seasonality and how far food travels) is an increasingly important practical Food Tech lesson. Through preparing, cooking and presenting a variety of savoury and sweet dishes, students develop a wide range of practice educational years. As part of this curriculum, we ensure that chosen dishes reflect cultural diversity within the UK and internationally, but also celebrat from the post-war era to modern day.  |
